

# SciList

CaRob Computing's

Science Equipment  
Management System

## Use SciList if you'd like to...

- Have records of all your equipment and consumables in one central system
- Be able to locate any item quickly
- Be able to print stock lists by location, or by category and/or by discipline
- Allow staff to browse for equipment without being able to alter the records
- Have prep gear recorded, but not viewable by general staff
- Streamline stocktakes, and archive re-order lists
- Manage purchase orders, and maintain purchase histories

## Features of SciList ...

- Record items with locations and sub-locations e.g. Room G5, Shelf 7
- Associate items with one or more Disciplines e.g. Biology, Chemistry
- Associate items with one or more Categories e.g. Electrical, Aquarium
- Keyword searching for items
- Display images of items
- Print stock lists by location, category, and/or discipline
- Print location stock lists with quantities and check boxes for stocktake
- Record stocktake results and produce purchase orders by supplier
- Monitor outstanding orders, mark off received items, and keep a purchase history
- Simple to install and operate
- Flat menu structures make it easy to navigate
- All reports offer Acrobat Reader, HTML, or text output options
- Secure password protection and levels of access
- Network compatible

SciList allows you to  
import your existing data  
from a spreadsheet or  
similar format
